**Skatewave™ Unveils New 2.0 Products at National Recreation and Park Association Show**

**Minneapolis – October 16, 2002** – Skatewave™, the largest manufacturer of community skateparks in North America, unveiled new Skatewave 2.0 products at the National Recreation and Park Association show Oct. 15.

Like all other Skatewave 2.0 products, these new products feature a PVC-coated, heavy-gauge steel. The products include three new quarter pipes in heights of 4', 6' and 7', plus new launch boxes, banks and spines in both 4' and 5' heights. In addition, there is a 45-degree hip and a 4' x 8' deck that is ideal for creating obstacles for BMX freestylers.

Skatewave also reintroduced its 2' pyramid and 3' banks with new angles. Three new pyramid ledge configurations are also available on pyramids with the new 4' x 8' deck.

These new and enhanced obstacles were designed based on feedback from riders and customers. The products can be seen by visiting the Skatewave web site at [www.skatewave.com](http://www.skatewave.com).

Since its introduction in March 2001, Skatewave has installed more than 250 skateparks in communities across North America. Skatewave Modular Skatepark Systems is a division of Landscape Structures Inc., Delano, Minn. Founded in 1971 by Barb and Steve King, Landscape Structures is the leading innovator in the design and manufacturing of high-quality play equipment for municipal parks, schools and child care centers.

For more information about the revolutionary Skatewave Modular Skatepark Systems, please visit the Skatewave web site at [www.skatewave.com](http://www.skatewave.com), or call Skatewave at 1-866-SK8-WAVE (866-758-9283).
